Jonathan,

I see a lot of press and activity in the market around wearable camera systems for law enforcement. Not sure if CPD has looked at such systems, but I would like to pick your brain about them. Would you mind replying to the following three questions?

- Is CPD evaluating the use of wearable camera systems?
- If so, would you look at such systems for every patrol officer or just special groups?
- Would you look at wearable camera systems replacing traditional in car video systems?
- How would you fund the purchase of such systems (Chicago/CPD corporate budget, DHS grants, DOJ grants, asset forfeiture funds)?

Thank you in advance to your time,

John Kedzierski

Continued...

Alex,

Also, we *did not* ask you to publish this report to CLEAR. We asked if you could fix the issue with the inventory numbers which has not been resolved. We have had a BAS request in for help with additional fields since November of 2011 and again in December of 2012. We need this report fixed and then sent back as an attachment to me.

The report you published in CLEAR is providing inaccurate data and we cannot rely on this report to meet our mandated forfeiture deadlines. The problems we are having are related to way data is being transferred to the tables in CLEAR_DW. The inventory numbers were once transferred from the fields in Hot Desk and they stopped working after the new system rolled out. The additional problems associated with the narcotics fields are pulling data from the property inventory tables and they should be pulled from the Arrest_All tables. Without seeing the original report I sent you I would not be able to tell you what was fixed. I am familiar with all of the tables in this report and if you can simply make the inventory numbers available in CLEAR_DW I can resolve this issue myself. The same can be done with the narcotics type and weight. I just need to data added to the Arrest_All table and the report should work properly.

NOTE: If you would like me to seed a copy of the various BAS requests we sent to PSIT or the various e-mail messages regarding issues with our crystal report please let me know and I will send copies.

Thanks,

Renee

Renee,

I ran the report using 09-10 MAY and it worked fine. It appears from your screen shot that you are trying to query a date in the FUTURE and that is why it is timing out.

I understand you have reporting needs and we have published your report as you presented it however PSIT is not staffed to instruct Department members on Crystal Reports builds and formatting.

I suggest you follow up with a request to R&D on your specific report needs as they are staffed with analysts that can perform the function you seek.

Subject: AFI Crystal Report still not functioning

Importance: High

Alex,

I tested the report you fixed for us that you published in business objects. I was not able to run the reports needed to release vehicles today because all this report does is hang... I have provided a screen shot for you to view. Also, the report is missing the option to query by time and date. We use different queried times and if necessary add fields to these reports as needed for specific investigative purposes. If you could send us the original functioning crystal this would be easier for us to use and revise as needed.

Thanks,

Renee

Subject: FW: Question

Lt,

We are working to restore the Data Warehouse that will enable your report to run.

ARS temporarily assumed the function of entering tow records into Hot Desk from Streets & Sanitation. The Hot Desk and related Data Warehouse tables can only display what is in the system.

ARS is doing the best they can with this task and is aware of the urgency in this matter. In addition to CPD, CDOT, DoIT, Streets & Sanitation, NICB all rely on the Hot Desk data and we are assisting in every way possible to provide it.

I will keep you updated on the progress.

Alex,

Also, we *did not* ask you to publish this report to CLEAR. We asked if you could fix the issue with the inventory numbers which has not been resolved. We have had a BAS request in for help with additional fields since November of 2011 and again in December of 2012. We need this report fixed and then sent back as an attachment to me.

The report you published in CLEAR is providing inaccurate data and we cannot rely on this report to meet our mandated forfeiture deadlines. The problems we are having are related to way data is being transferred to the tables in CLEAR_DW. The inventory numbers were once transferred from the fields in Hot Desk and they stopped working after the new system rolled out. The additional problems associated with the narcotics fields are pulling data from the property inventory tables and they should be pulled from the Arrest_All tables. Without seeing the original report I sent you I would not be able to tell you what was fixed. I am familiar with all of the tables in this report and if you can simply make the inventory numbers available in CLEAR_DW I can resolve this issue myself. The same can be done with the narcotics type and weight. I just need to data added to the Arrest_All table and the report should work properly.

NOTE: If you would like me to seed a copy of the various BAS requests we sent to PSIT or the various e-mail messages regarding issues with our crystal report please let me know and I will send copies.

Thanks,

Renee

Subject: RE: AFI Crystal Report still not functioning

Renee,

I ran the report using 09-10 MAY and it worked fine. It appears from your screen shot that you are trying to query a date in the FUTURE and that is why it is timing out.

I understand you have reporting needs and we have published your report as you presented it however PSIT is not staffed to instruct Department members on Crystal Reports builds and formatting.

I suggest you follow up with a request to R&D on your specific report needs as they are staffed with analysts that can perform the function you seek.

Subject: AFI Crystal Report still not functioning
Importance: High

Alex,

I tested the report you fixed for us that you published in business objects. I was not able to run the reports needed to release vehicles today because all this report does is hang... I have provided a screen shot for you to view. Also, the report is missing the option to query by time and date. We use different queried times and if necessary add fields to these reports as needed for specific investigative purposes. If you could send us the original functioning crystal this would be easier for us to use and revise as needed.

Thanks,

Renee

Lt,

We are working to restore the Data Warehouse that will enable your report to run.

ARS temporarily assumed the function of entering tow records into Hot Desk from Streets & Sanitation. The Hot Desk and related Data Warehouse tables can only display what is in the system.

ARS is doing the best they can with this task and is aware of the urgency in this matter. In addition to CPD, CDOT, DoIT, Streets & Sanitation, NICB all rely on the Hot Desk data and we are assisting in every way possible to provide it.

I will keep you updated on the progress.

Attachments: seized_vehicle_10may2012.pdf; seized_vehicle_06may_11may2012.pdf; seized_vehicle_10may_11may2012.pdf

The report ran for me. It took a little time to do the 06-May to 11-May output but it did not time out. If they are having time out issues it could be PC related or they can use the "schedule" link and select the parameters to run the report. I will add the time selection to the date parameters.

As far as the "original functioning report" goes, the report you sent me was not working. It was not a report we developed. So they need to go to whomever developed the original report to obtain the previous working version.

Subject: Question

Bob,

Do you know number I can call to inquire about specific cars that have been impounded. For example, if I have a license plate number and need to know that pound number. I need a contact number or person I can use on a daily basis for this information. Thanks
